iGaming Simple Analysis

– Taking into account your limited time

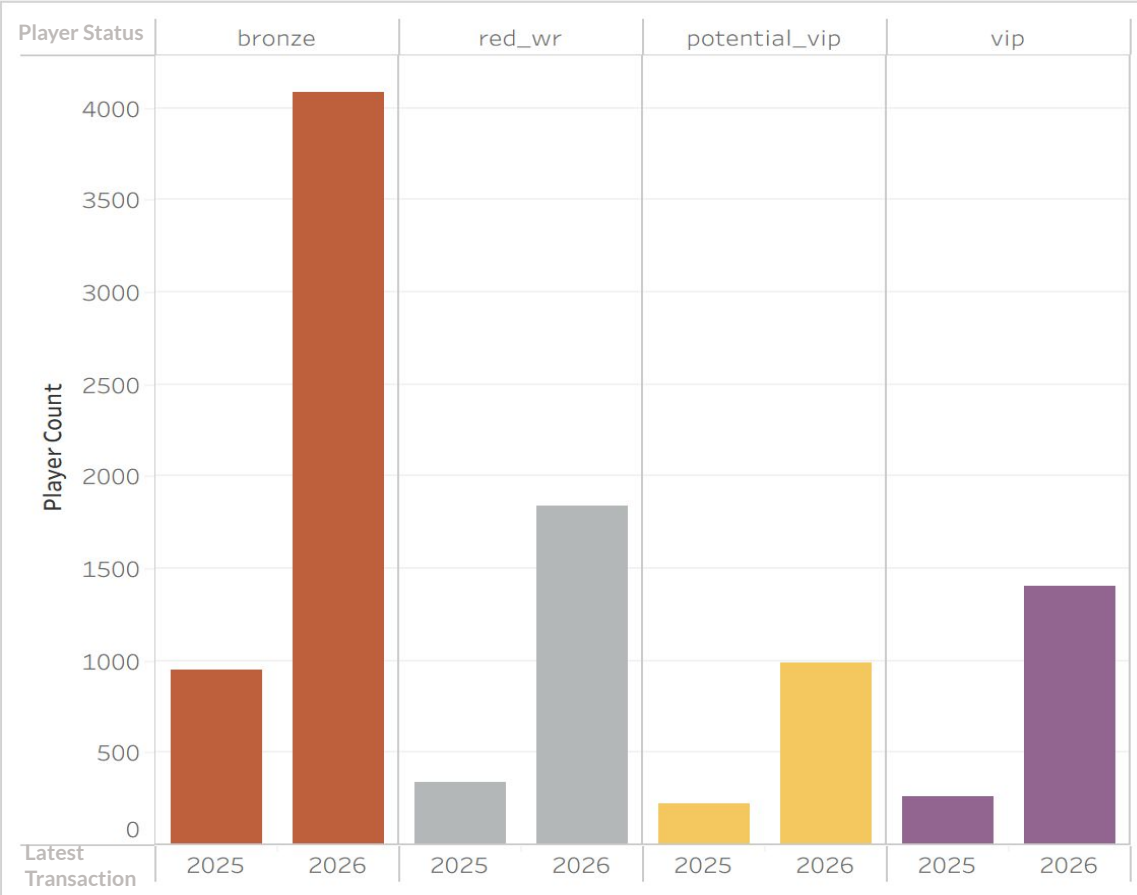

– Insights from a previous market lead

– 1 operational bottleneck spotted at Entain

– Showing a simple solution

SYNTHETIC CONCEPT STUDY | NO REAL PLAYER DATA AVAILABLE

Inactive Volume Draining Loyalty Team's Resources

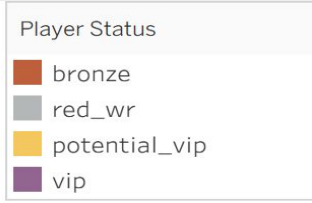

- VIP Team's Limited Time And Resources

- Customer Support Prioritizing The Wrong Customers

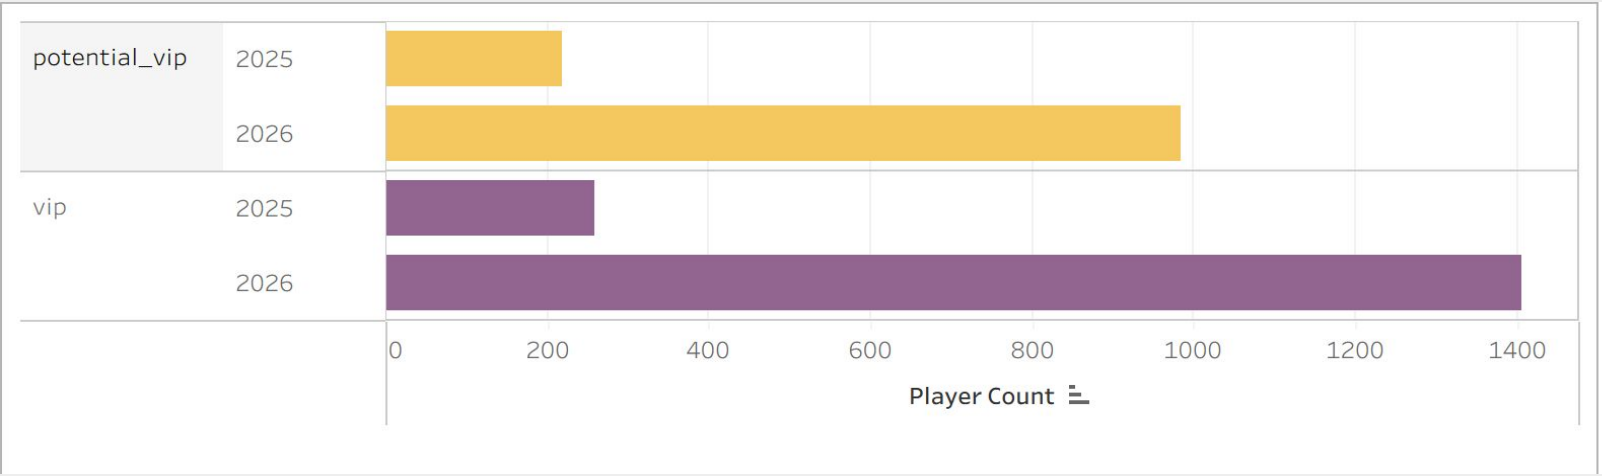

- Actual Loyal Customers Getting Less Value

- Bonus Offers, Marketing And Attention Distributed Wrongly

- Common Problem With iGaming Companies

VIP STATUS IS NOT LIVE ENGAGEMENT

- Inactive Players Potentially Retaining Outdated High-Value Status

- Manual Status Reviews Consistently Lagging Behind

- Risk of Retention Offers Reaching Inactive or Already Churned Players

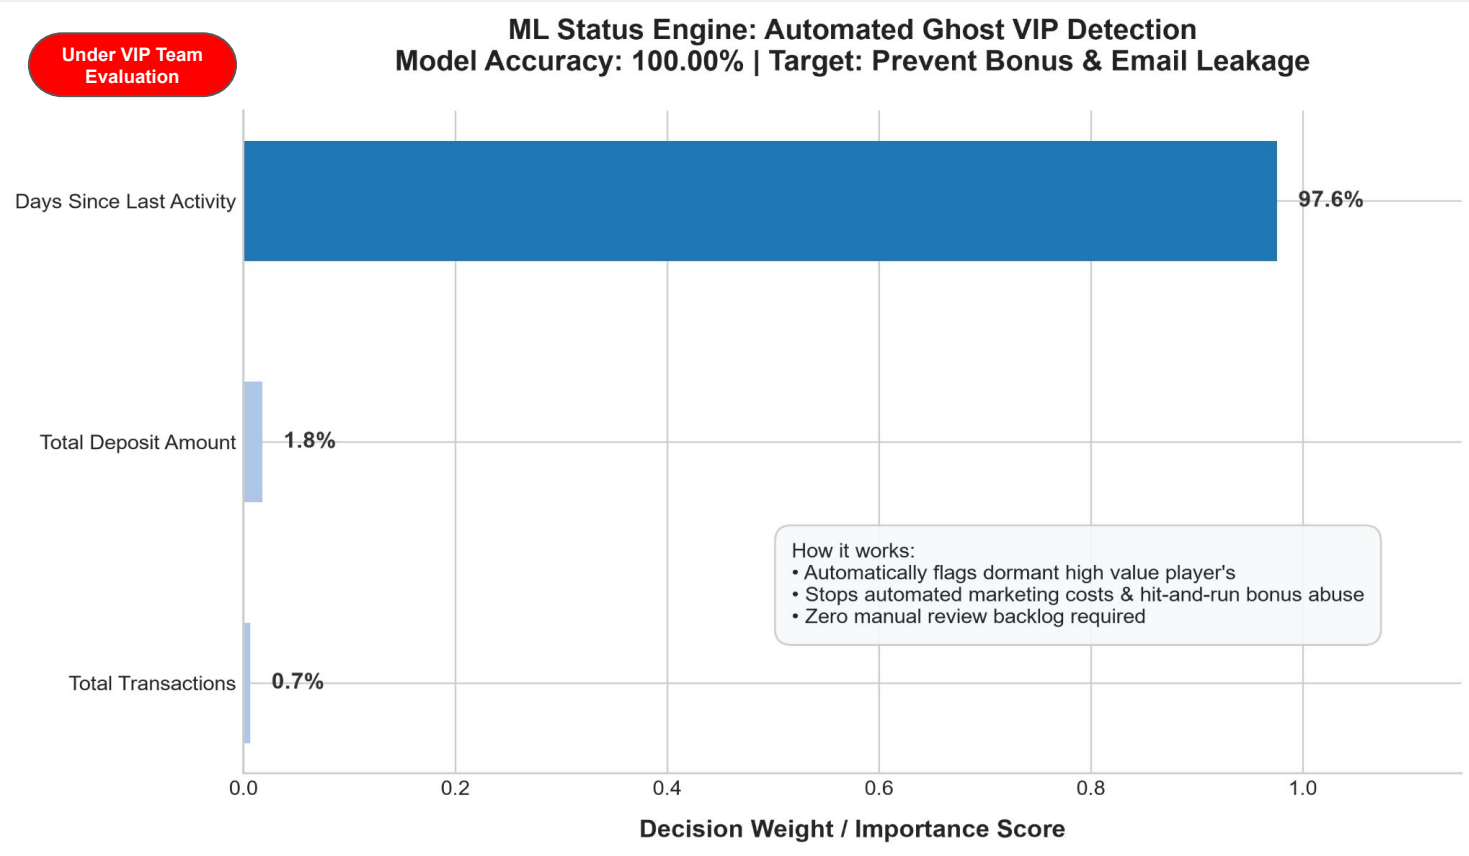

- Outdated Status Tags Causing Cross-Team Miscommunication

- Massive Enterprise Email And Messaging Volumes Incurring Infrastructure Costs With Little To No Return

The real question:
how much VIP time and budget could we save?

Machine Learning Solution

100% match on fixed synthetic labels — not a live prediction score

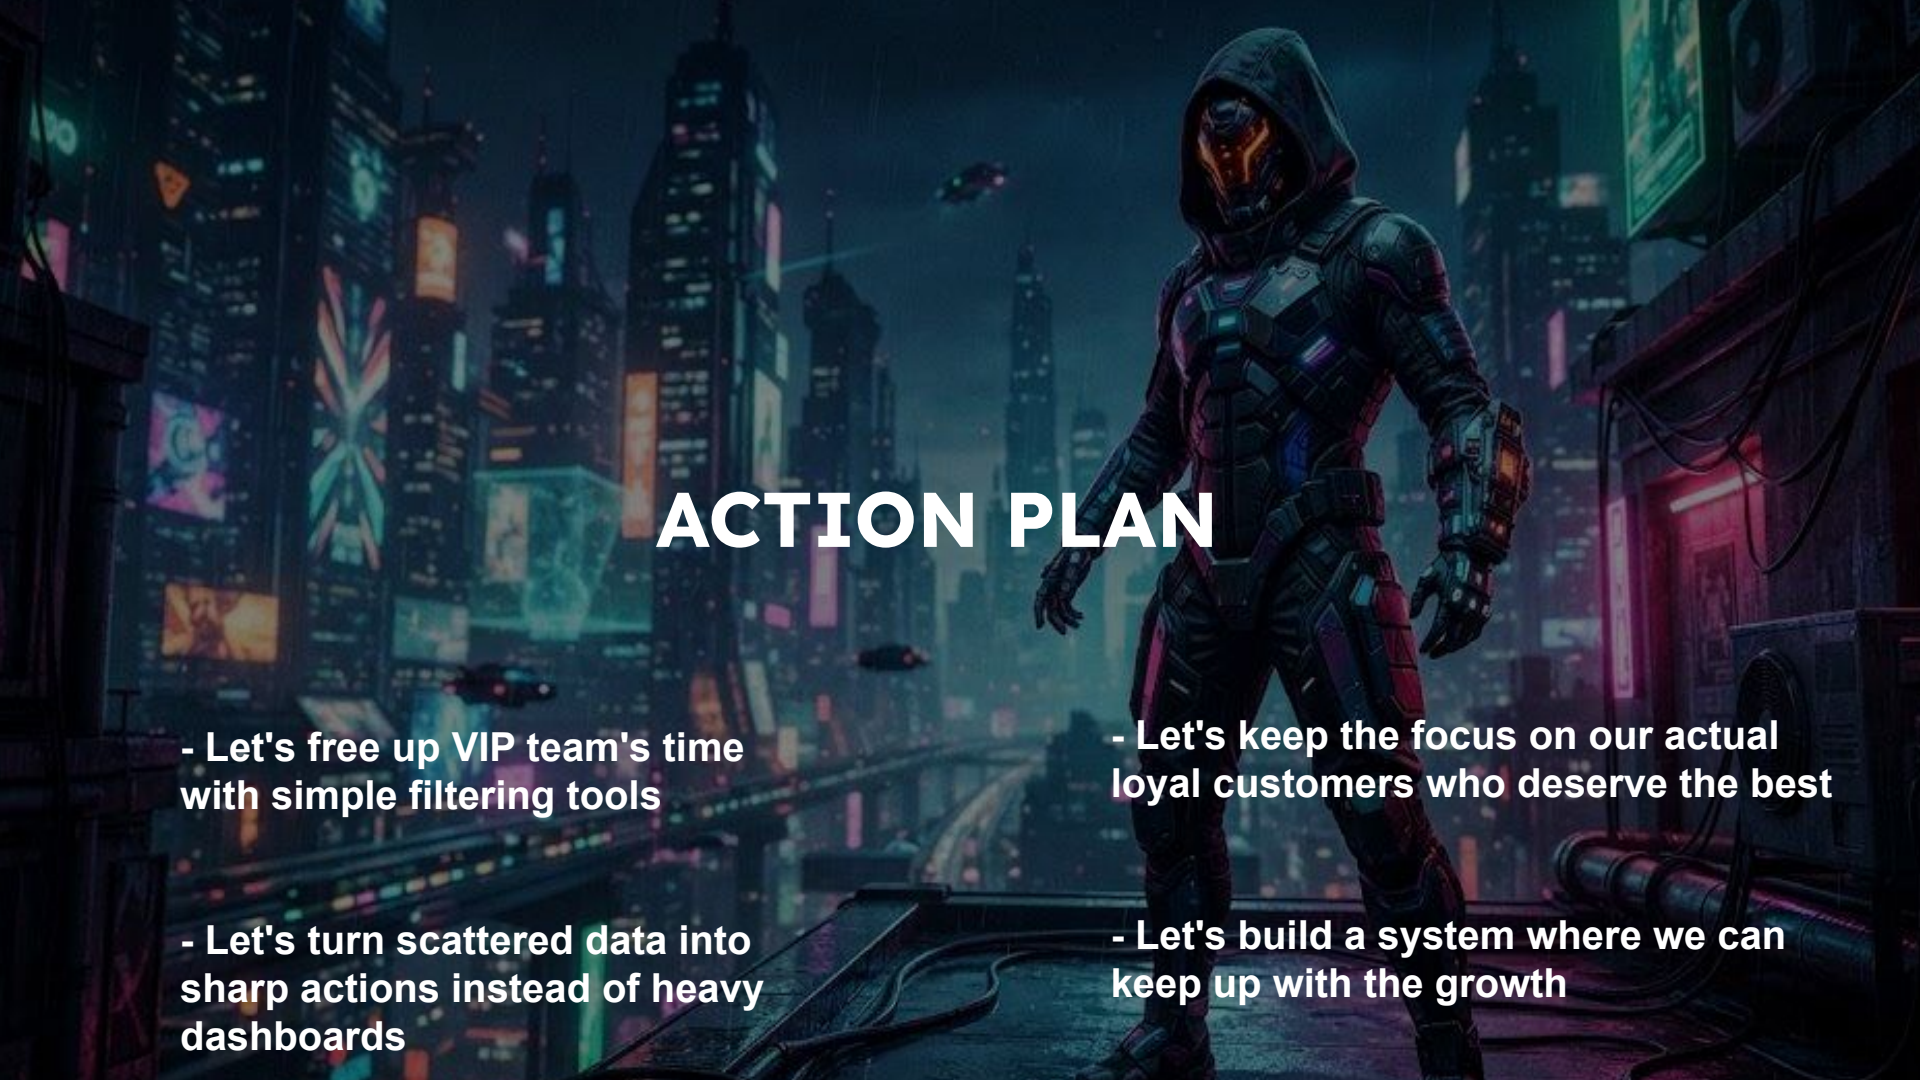

- Automated Tag Switching: Instantly Flagging Accounts to "Under VIP Evaluation"

- Keeps departments updated while preventing unnecessary spending on churned players.

- Frees up high-value resources from manual clean-up tasks to focus entirely on genuine, active high-rollers

- Stops players from aggressively demanding undeserved loyalty rewards triggered by lingering, outdated status lists.

ACTION PLAN

- Let's free up VIP team's time with simple filtering tools

- Let's keep the focus on our actual loyal customers who deserve the best

- Let's turn scattered data into sharp actions instead of heavy dashboards

- Let's build a system where we can keep up with the growth
